1. Let E, F, G be three events. Find expressions for the events that of E, F, G
   (a) Only F occurs.
   (b) At least two events occur.
   (c) At most two events occur.

2. Tossing two dices. What is the probability that the first die is six given that the sum of the dice is seven?

3. A family has two children. What is the conditional probability that both are boys given that at least one of them is a boy? Assume that boy and girl are equally likely.

Additional questions (Cooper & McGillem book):

p. 43 1-6.2 (a) (e) (f) (h), 1-6.3 (a) (c) (d) (e), 1-7.1, 1-8.1
